

SCLL- Add at last position

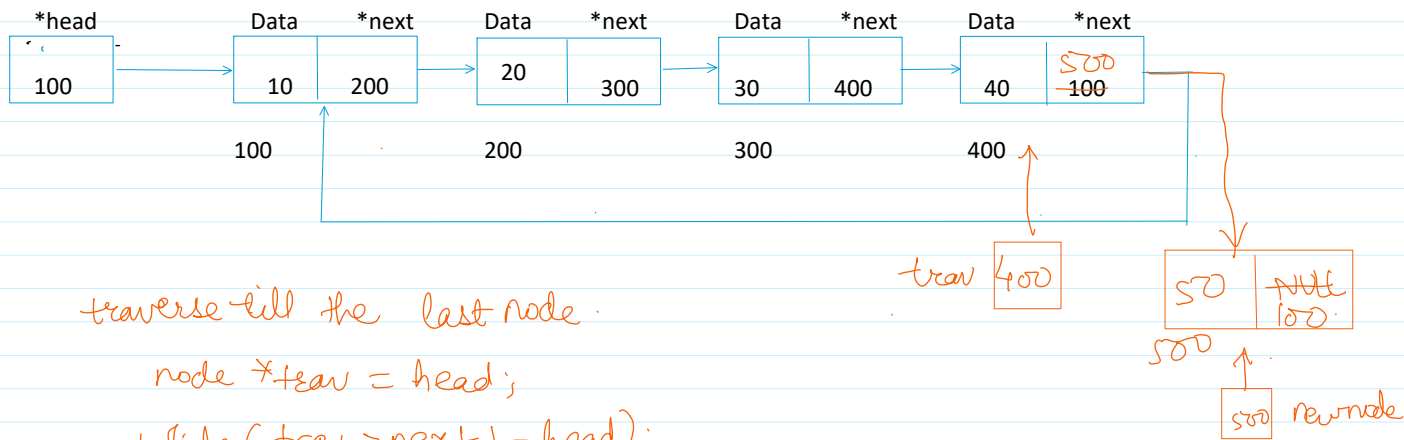

30 October 2023 15:06

If list is empty

```
if (head == NULL) {
    head = newnode;
    newnode->next = head;
}
```

If list contains multiple nodes

traverse till the last node.

node *trav = head;

while (trav->next != head)

{

trav = trav->next;

}

trav->next = 500;

trav->next = newnode; ✓

newnode->next = 100;

newnode->next = head; ✓
